chdog also criticised a ban imposed by the Philippines last week on migrants leaving to work in Kuwait, saying it was likely to increase the number resorting to unregulated channels that exposed them to a greater risk of abuse.

President Rodrigo Duterte imposed the ban in response to the murder of a Filipina maid whose body was found stuffed in a freezer in Kuwait earlier this month. He triggered a diplomatic row with Kuwait by alleging that Arab employers routinely raped their Filipina workers, forced them to work hours a day and fed them scraps.

"Kuwait should confront the outcry over deaths, beatings and rapes of domestic workers by taking immediate steps to reform the kafala system, which traps workers with abusive employers," HRW's Middle East women's rights researcher Rothna Begum said

in a statement late Wednesday. The kafala or sponsorship system, widely prevalent in the oil-rich Gulf states, ties migrant workers' visas to their employers, prohibiting workers from leaving or changing jobs without prior consent.

"The Philippines should work with Kuwait to protect workers rather than ban them from migrating, which is more likely to cause harm than to help," Begum said .-- AFP

WASHINGTON: Elon Musk's Space-X sent a Spanish military satellite into orbit Thursday in a hitch-less liftoff from California, extending the private space company's record of successful launches.

Space-X, which proved the utility of its massive Falcon Heavy rocket earlier this month. put up the Paz imaging satellite and two of the company's own test internet communications satellités on a smaller Falcon 9

"Successful deployment of PAZ satellite to low-Earth orbit confirmed," Space-X said about nine minutes after liftoff at 6:17 AM (1417 GMT) from Vandenberg Air Force Base on the central California coast.

The Paz satellite, on the Spanish government Hisdesat satellite operator, was sent into a low-earth orbit vertically circling the north and south poles, giving it a constant sunlit view of the earth's surface below. The launch took place a day later than planned; liftoff was scrubbed Wednesday due to high winds in the upper atmosphere.

Besides the Paz satellite, the rocket carried two dummy satellites representing Musk's plan to place a thousands of low-cost satellites in orbit to provide global broadband internet service, including to poorly served low-income countries.-AFP
