1. INTRODUCTION**1.1****Introduction**

Pakistan experienced extensive monsoon rains in July-August 2010, which generated unprecedented flood flows in primary, secondary and other rivers including hill torrents and local nullahs. Rivers Swat, Panjkhora and Kabul experienced historic flood flows, which crossed the historic flood peaks. The floods caused huge damages to private and public infrastructure including irrigation networks and flood protection works across Pakistan. The flood damages to the irrigation and drainage infrastructure are estimated at Rs 23,600 million.

In Sindh, four breaches in flood protection embankments, Left Marginal Bund of Guddu Barrage and Tori, MS and PB Bunds, caused main damages. The Tori Bund breach had inundated entire North West Canal command area and damaged much of the infrastructure on its way back to the Indus River.
