	Digital Mammography system consisting of exposure panel with swivel arm system, including specialized Mammography Chair, control box for exposure release, a mammography X-ray tube, an integrated direct-to-digital Flat Detector and an Acquisition Workstation (AWS) for image acquisition, patient work list data management. The AWS must send, receive and print according to the DICOM standards.		No direct-to-digital	No direct-to-digital	Yes
	The system must be designed for high patient volume screening, providing high patient throughput and reliability. It must also provide additional benefits of digital imaging.		Yes	Yes	Yes
	The Acquisition Workstation must enable immediate preview for fast image quality monitoring. After exposure, the image must be displayed on the monitor for the user to check the positioning of the patient.		Yes	Yes	Yes
	The workstation must be fully DICOM compatible with regards to send/receive, query/retrieve and printing of images.		Yes	Yes	Yes
	<b>BASIC UNIT</b>				
	Swivel arm system consisting of X-ray tube unit, compression device with integrated detector		Yes	Yes	Yes
	Motorized, isocentric rotation of the swivel arm with rotation angle		Yes	Yes	Yes
	Motorized and manual compression with pre-selectable compression force		Yes	Yes	Yes
	Digital display of compression force and compression thickness		Yes	Yes	Yes
	Automatic collimation to the required radiation field size according to the compression plate selected		Not mentioned	Not mentioned	Yes
	Integrated positioning/collimator light		Yes	Yes	Yes
	Function for optimizing compression force		Yes	Yes	Yes
	Pre-programmable exposure parameters for optimized patient dose and AEC (Automatic Exposure Control)		Yes	Yes	Yes
