China, Vietnam to address maritime dispute without using 'megaphone diplomacy'

SHANGHAI: Senior Chinese and Vietnamese officials have agreed to settle their maritime disputes without resorting to "megaphone diplomacy", the official Xinhua news service said on Saturday.

The agency's report follows a meeting in Hanoi on Friday between Chinese political advisor Yu Zhengsheng and Vietnamese Prime Minister Nguyen Tan Dung, and it comes as Beijing backs off from aggressive attempts to press its territorial claims in the South China Sea. "Megaphone diplomacy can only trigger volatility in public opinion, which should be avoid-

ed by both sides," the report quoted Yu as saying.

"The maritime issue is highly complicated and sensitive, which requires negotiations to manage and control differences," he said.

Although major trading partners and sharing the same nominal commitment to communism, China and Vietnam have a long history of distrust and conflict, including a short war in 1978 when Chinese troops invaded Vietnam in response to Hanoi's invasion of Cambodia, run at the time by the China-backed genocidal Khmer Rouge regime. Both governments, which lay claim to

revolutionary credentials of resistance to foreign invaders, must also placate their respective nationalists demanding more aggressive defence of territory. The conflict has been aggravated in recent years as China has grown more assertive about its claims in South China Sea, which set China's sea border hundreds of kilometres south of its land mass to hug most Vietnam's coast. China pressed those claims dramatically early in 2014 by placing an oil drilling rig in waters claimed by Vietnam, then confronted Vietnamese vessels attempting to approach the platform with water cannon and

ramming tactics. Vietnamese firms reacted by trashing Chinese factories (and factories they took for Chinese) in Vietnam, and the government moved to warm military ties with the U.S. and also bought Kilo-class attack submarines from Russia as a deterrent.

Beijing has since reined in the oil rig and has signalled it wants better relations with Vietnam. China has recently launched initiatives for a regional investment bank and an infrastructure fund, which would position it as a dominant driver of regional economic development. XINHUA

Drug addiction is a global social evil.

China to list legal places of worship, 'root out' illegal

SHANGHAI: China is to publish online details of legal religious venues, the official Xinhua news agency reported Saturday, apparently in an effort to identify unsanctioned groups as part of an effort to "root out illegal religious activities".

Names and addresses for Buddhist and Taoist venues would be published within weeks, Wang Zuoan, director of the State Administration of Religious Affairs, told a conference on Friday, according to news agency.

Xinhua made no mention of other religions but it quoted the news agency as saying the information will help stop illegal religious activities in unauthorised locations.

The government's attitude toward religion has softened significantly in recent decades as people are allowed to practice religion at sanctioned institutions that are required to preach practice loyalty to the government.

Despite the rules, unlicensed religious movements which the authorities call "cults" have proliferated in recent years and the government has grown increasingly active in trying to discourage their growth.

A court jailed 21 members of a banned religious movement in Quannengshen and executed two this year after members accused of murdering a woman.

Beijing also maintains a watch on the Falun Gong church which has become one of the most strident public opponents of the Chinese Communist Party. REUTERS
