List of Chemicals to be Purchased for Lab 314 (Pharmacology)

The technical committee meeting of the tender # HEJ060213 was held on 8<sup>th</sup> March 2013. Three bids were received for the required reagent. After carefully studying the required antibodies and their specifications, the following antibodies are selected to be purchased from the 2<sup>nd</sup> lowest bidder AIS:

1. *Active caspases 3 antibody*
2. *Anti Bcl2 antibody*
3. *Bax (2D2) antibody*
4. *HIF-1 alpha antibody*
2. *COX-2 antibody*

The lowest bidder DJ Scientific also quoted the same antibodies but it is decided not to purchase the required reagents from them. The rational behind this decision is based on the fact that we did choose DJ Scientific for the supply of antibodies earlier. After months of waiting we were informed that they can no longer provide us the required agents (copy of their mail is attached). This non-professional attitude of the supplier unnecessarily delayed our research and also the time of the research fellow working on that specific project. Therefore, it is decided to purchase the required antibodies from the 2<sup>nd</sup> lowest bidder AIS. It is requested to kindly allow us to process our order via AIS.
