

# **GAMBAT INSTITUTE OF MEDICAL SCIENCES**

## **TENDER DOCUMENTS FOR THE PURCHASE OF SUPPLY OF DRUGS /MEDICINE /CONSUMABLES / OTHER STORE STOCK / MISC: ITEMS. FOR (LIVER TRANSPLANT / CARDIOLOGY / KIDNEY TRANSPLANT) CALLED ON 03-06-2016 AT GAMBAT INSTITUTE OF MEDICAL SCIENCES**

### **GUIDELINES FOR USAGE OF STANDARD SPECIFICATIONS OF DRUGS / MEDICINES**

#### **Finished Drug Products**

#### **REGULATORY REQUIREMENTS:**

All Finished Drug Products (FDPs) or finished goods (ready for use) should have evidence of registration and latest renewal status with the Ministry of Health, Government of Pakistan (GOP) under the Drugs Act, 1976. According to the rules framed by the GOP under Public Procurement Rules-2004, specifications shall allow the widest possible competition and shall not favor any single contractor or supplier nor put others at a disadvantage. Specifications shall be generic and shall not include references to brand names, model numbers, catalogue numbers, or similar classifications. However, if the procuring agency is convinced that the use of or a reference to a brand name or a catalogue number is essential to complete an otherwise incomplete specification, such use or reference shall be qualified with the words "or equivalent".

#### **IDENTIFICATION:**

Each FDP must be identified by the International Non-proprietary Name (INN) or generic name thus:

- The Active Pharmaceutical Ingredient (API) base or the pro-drug compound, salt or ester, as applicable.
- The pharmaceutical dosage form
- The amount of active ingredient in each unit dosage form; where this is given in terms of the salt, ester or pro-drug, the equivalent amount of active moiety must be specified.
- Route of administration.

#### **MONOGRAPH SPECIFICATIONS:**

The Gambat Institute of Medical Sciences may accept any of the following internationally recognized pharmacopoeia monographs for drugs:

- The British Pharmacopoeia (BP),
  - European Pharmacopoeia (Ph. Eur),
  - International Pharmacopoeia (Ph. Int)
  - United States Pharmacopoeia (USP).
- Whenever used, the year of publishing of the pharmacopoeia must be specified.
  - If there is no monograph, manufacturers specifications are acceptable.

## **GENERAL REQUIREMENTS FOR DOSAGE FORMS:**

Each FDP should comply with the general requirements for dosage forms of the relevant edition of BP, Ph.Eur, Ph.Int or USP. At the minimum, all dosage forms must be packed:

- To facilitate course-of-therapy usage, unless specified otherwise.
- Along with calibrated dose measuring and delivery devices as applicable.
- In tamper-evident packaging.
- In rigid paperboard boxes (unit carton and master carton), strong enough to resist crushing during transportation, handling and storage.

## **PACKAG**

### **IN:**

The packing material that is in direct contact with the dosage form is called primary package or immediate container e.g. aluminum/PVC foil (blister) is primary package in case of tablets dosage form. A secondary package is not directly in contact with the dosage form e.g. paperboard boxes (unit carton). All packaging must be designed so as to protect the dosage form and to render it suitable for the intended use throughout the stated shelf life.

- All the packing Materials used must conform to the relevant edition of the BP, USP, Ph.Eur or Ph.Int with reference to the specific API and dosage form; must be safe for use with the dosage form for the intended route of administration; and be suitable for transportation, handling storage at extreme temperatures and humidity.
- Packaging must facilitate the distribution to the lowest level health facilities as well as dispensing to individual patients and their subsequent adherence. Product packaging that facilitates patient adherence is encouraged.
- The size of the container should be proportional to its contents with the addition of appropriate padding to prevent damage to the product during shipment.
- Liquid should be packed in unbreakable, leak proof bottles or containers.
- Glass bottles must be packed individually in cartons.
- For glass ampoules, single ended, break-off necks are preferred. Alternatively, packages should include an adequate supply of ampoule files facilities breaking.
- Light sensitive product should be packed in light resistance containers.
- Individual ampoule should be packed in plastic or carton trays (5 to 10 ampoule) with the trays packed (for example, in amount of 100) in outer carton.
- All the liquid preparations must be pilfer proof or bottles must be sealed.

## **LABELS**

Both languages, Urdu and English, should be mentioned on the label.

- Type of labels: Labels should preferably be direct on the container/packaging. Self-adhesive labels should be used and the paper of the label should be protected against humidity, be affixed to be tamperproof and prevent detachment during transportation.
- The writing on primary and secondary packs must be in indelible ink.

## **INFORMATION REQUIRED ON LABELS:**

The label and packing should be in accordance with the Drugs (Labeling and Packing) Rules, 1986 or any latest instruction issued by Ministry of Health. The following label information is mandatory for Finished Drug Products to be supplied for Gambat Institute of Medical Sciences:

- International Non-proprietary Name (INN) or generic name or pharmacopoeial name of the drug and brand name/trade name, in a bold, clearly visible font size. Names must not be abbreviated anywhere, including on labels and package inserts.
- Amount of API or active moiety per dosage unit, unit of volume or unit of weight.
- Pharmaceutical dosage form. The pharmacopoeia standard of the Finished Drug Product;
- Net quantity per unit pack labeled on that unit pack (primary, secondary, tertiary) in a visible manner.
- Directions for use.
- Any special instructions for use e.g. "to be swallowed whole - do not chew".
- Storage instructions.
- Special storage and handling instructions, including warnings and precautions.
- If a product has a limited shelf life after the primary package is opened and manipulated, this should be indicated on the label
- The shelf life of reconstituted drugs must be mentioned on the label.
- For products requiring reconstitution before use (for example, powder for Injection) instructions should be on the label.
- "Keep out of reach of children" statement
- Batch identification.
- Manufacture date.
- Expiry date in a format that can be easily understood. The items should be a long expiry.
- Name and address of manufacturer. In case product is marketed under mutual manufacturing contract, indicate as: manufactured by company A for company B.

### **INFORMATION REQUIRED ON MASTER CARTON:**

Label of the primary packaging must be pasted on the master carton along with the following additional information.

- Total number of packs placed in the master carton.
- The symbols of breakable, keep away from the rain and arrow.
- The storages and handling instructions.
- Weight and size.

### ***Summary of product characteristics (SPC) and package inserts (patient information leaflets):***

The SPC as well as a detailed pack insert/patient information leaflet (PIL) as per standards and norms for each Finished Drug Product must be provided.

### **SUITABILITY OF BRAND NAMES OR REGISTERED TRADE NAMES:**

The INN or generic name or pharmacopoeial name and brand name will be written in equal prominence on all labels and pack inserts. The brand name/registered trade name will not be so prominent as to mask the appearance and readability of the INN or generic name or pharmacopoeial name.

### **SHELF LIFE AND STORAGE:**

- The assigned shelf life and recommended storage conditions should reflect the outcome of stability studies and be printed on labels and PIL.
- The manufacturer/supplier is responsible to inform the Gambat Institute of Medical sciences special transport and packaging is required for any drug/medicine, such as cold storage.
- The supplier/manufacturer specify the required minimum shelf life remaining for all pharmaceutical products because of the length of time required for local distribution, it is advisable to include a general condition that, at the time of delivery/arrival, at least 75% of the shelf life should upon receiving.
- The drugs/medicines should be stored in accordance with the storage conditions as recommended by manufacturer.

### **MANUFACTURING STANDARDS**

- Good Manufacturing Practice (GMP): FDPs must be manufactured as per GMP guidelines notified by the Ministry of Health.
- **Commitment:** The manufacturer/suppliers shall inform the Programme immediately about any serious quality and/or safety concerns related to the manufacture, control or use of their product, including suspension or cancellation of registration or cancellation/suspension of Drug Manufacturing License.
- The manufacturer/supplier assures to work with the Programme to minimize potential public health risks by actively organizing product recalls of defective products and either in replacing the defective product or covering the direct and related costs related to replacing the defective product within defined timelines as specified in the contractual requirements.

**Model secondary packing details of various dosage forms  
Syrup (120 Milliliters)**

Secondary packing items:

- Unit carton
- Label
- Master shipper

Composition:

**Tablets (14 Tablets):**

Secondary packing items:

- Unit carton
- Leaflet
- Final carton
- Master carton

**Composition:-**

- Each unit carton contains a leaflet and 1 strip of 14 tablets
- Each final carton contains 50 unit cartons with 700 tablets
- Each master carton contains 6 final cartons with 4,200 tablets

**Cream (35 Grams):**

Secondary packing items:

- Unit carton
- Leaflet
- Final carton
- Master carton

**Composition:**

- Each unit carton contains a leaflet and 1 alu-tube having 35 gram cream
- Each final carton contains 10 unit cartons with
- Each master carton contains 100 final cartons with

**Capsule (30 Capsules):**

Secondary packing items:

- Unit carton
- Leaflet
- Final carton
- Master carton

Composition:-

- Each unit carton contains a leaflet and 3 strips of 10 capsules each.
- Each final carton contains 50 unit cartons having with 1,500 capsules.
- Each Master carton contains 8 final cartons with 12,000 capsules.

## **Suspension**

Secondary packing items:

- Unit carton
- Label
- Leaflet
- Master shipper

Composition:-

- Each unit carton contains a leaflet and a 60ml glass bottle with label having 30ml dry powder + a 20 ml ampoule of aqua water
- Each master carton contains 50 unit cartons

## **Injection (Ampoule):-**

Secondary packing items:

- Unit carton
- Label
- Leaflet
- PVC tray
- Final carton
- Master carton

Composition:

- Each unit carton contains a leaflet with 2-cc glass ampoule with label, holding with PVC tray.
- Each master carton contains 50 unit cartons.

## **Injection (1000 mg Vial & Ampoule):-**

Secondary packing items:

- Unit carton.
- Label.
- Leaflet.
- PVC tray.
- Final carton.
- Master carton.

Composition:-

- Each unit carton contains a leaflet, a 15ml glass vial with label and an ampoule, holding with PVC tray.
- Each final carton contains 100 unit cartons.
- Each master carton contains 2 final cartons with 200 injections.

## **TERMS AND CONDITIONS**

- 1.** Earnest Money 3% as demand draft in the name of Director Gambat Institute of Medical Sciences.
- 2.** Income Tax Certificate.
- 3.** Drug /Medicine License.
- 4.** NIC Card Photocopy.
- 5.** Sales Tax Certificate.
- 6.** Under taking not black list in any Department.
- 7.** Bank Statement.
- 8.** Proof for supply to Government of Semi Government Department.
- 9.** Supplier must be Manufacturer or Sole Distributor.
- 10.** Supplies must be supplied from the Manufacturers Godown.
- 11.** All the Items must be quoted on the prescribed Proforma issued by the Institute.

Director  
Gambat Institute of Medical Sciences
