Post Box No. 3514, Karachi - 74800

called or where risks of substantial design variations are minimal, usually construction of buildings, power transmission towers, and series of small structures, such as bus shelters or ablution units.

- (ii) **Turnkey Contract** : In this type of contract the design, engineering, supply and installation of equipment and the construction of a complete facility and related works are required to be provided under a single contract.

Alternatively, the procuring agency may remain responsible for the design and engineering, and invite bids for a single responsibility contract for execution of works and supply and installation of goods required for the assignment. The scope of procurement may include maintenance and operation for certain period also.

Payments are made on the basis of percentage completion of each activity/stage of work, such as :

- (i) in case of highways : each kilometer completed;
 - (ii) in a project for constructing houses or class rooms : each of those units;
 - (iii) in the case of multi-storey building: excavation; foundation and plinth, frame work structure per floor; cladding per floor, services (electrical, plumbing, external sewers and drains) each payable as percentage completed in relation to the services for the whole building.
- (iii) **Scheduled Contracts/Unit Prices** : The contractor undertakes to execute the work at fixed rates. The sum he is to receive depend on the quantities and kind of work or material supplied. Following are the two kinds of schedule rates :
- (a) **Percentage rate contracts** are those in which the

contractor undertakes to execute the work at a fixed percentage above or below the rates exhibited. The sum he is to receive depends on the quantities and kind of work done or material supplied. In works, this method is used when **Composite Schedule of Rates (CSR)** is the source of description of items and their rates.

- (b) **Piece Work** : Repair works are commonly carried out as "*piece work*" – the agreements for which should be in the form of "work orders" on specific form and should contain only, a description of the work to be done and the percentage quoted above or below the Composite Schedule of Rates (CSR), without any reference to the total quantity to be executed or to the time within which it is to be executed. Procuring agency or the contractor may at any time terminate such agreement by notice in writing without claim to compensation by the other party. Specifications of the work to be done may be issued or reference thereof may be made in the work order, but shall not contain reference to quantity or time. Piece work contract cannot be extended beyond the financial year in which it is executed.
- (c) **Item Rate Contracts** are those in which the contractor undertakes to execute the work at the rates quoted by him in the tender. In an item rate contract quantities are shown but rates are not exhibited, and rates are to be quoted by the bidder in figures and words. Amount will be paid depending on the quantities and kind of work done or material supplied and rate quoted by bidder in BOQ.
- (d) Contract that is combination of a & c. A fixed sum is proposed for the completion of the work as specified and a schedule of rate is agreed upon by which to regulate the price to be paid or to be deducted for additions or alterations.
